"A world war in 2015 killed nearly three billion people. The people that survived grew closer together. Life is centered around the family and then the community. I can not imagine living even a few hundred miles away from my parents. There is no large industrial complex creating masses of useless food and recreational items. Food and livestock is grown and sold locally. People spend much more time reading and talking together face to face. Religion is taken seriously and everyone can multiple and divide in the heads."
"It has always surprised me why that concept is so hard for people to imagine and accept. Nothing would happen. The universe would not end and there are no paradox problems that threaten existence. Temporal space-time is made up of every possible quantum state. The Everett Wheeler model is correct. I have met and/or seen myself twice on different world lines. The first was a training mission and the second is now. I was born in 1998 so the other "me" is 2 on this world line. There is a saying where I come from….Every possible thing that can happen or will happen has already happened somewhere."
"For starters….the fact that I'm here makes it different. I've also noticed little things like news events that happen at different times, football games won by other teams…things like that. I would guess the temporal divergence between this world line and my original is about 1 or 2 percent. Of course, the longer I am here, the larger that divergence becomes from my point of view."

"Imagine your path through time is through a cone. The farther away from the center of the cone, the more differences you will see in the world line. The C204 begins to "break away" at about 60 years. This means the level of confidence drops rapidly after 60 years of travel and the world line divergence increases. In other words, if I wanted to go back 2000 years and meet Christ, there is a better than average chance I would end up on a world line where he was never born. The computer units and gravity sensors "record" your trip and you are quite easily able to return to your point of origin. I am aware that research is being done on faster units with more accurate clocks. I imagine that they will be able to go back farther with a higher degree of divergence confidence."
"From their point of view, I will return almost exactly at the same moment I left. From their viewpoint, I will only have aged more than expected."
"The hard part of traveling through time is not the bending of gravity but the plotting of your course and holding to the basic "position" in your environment. This is done through a system called VGL (variable gravity lock). Basically, the unit takes a reading of the local gravity and samples it during the "trip" in pulses. If the gravity is too far off, the unit stops or reverses itself to the last sample period where the readings were correct. If there is some sort of failure, the unit shuts down and drops out to where ever you may be."
"Perhaps it’s a bit easier to understand why time travelers do not revel themselves.
Yes, you can travel forward in time. No, you do not need an “invite” from the future. I first saw the car in 2036. The idea was to find a vehicle that would not draw too much attention for the time period. Unfortunately, there were not very many suitable vehicles around in 2036 and I sold the car when I arrived in 2000.

You do not rewrite history. I can only affect what happens here just as easily as you can. Why do people in this time period worry so much about time traveler’s destroying their world line when they have no problem doing it themselves every day?

My goal is not to be believed. Most people do not take news of the war very well but I find that everyone believes it’s inevitable. Even in your own history, are not great inventions and discoveries made during a time of war in your effort to kill and main in new and more efficient ways?
No, I do not work for GE or any other company. Are “stock tips” really the first thing you want to know about in the future? As a representative of your time period, do you realize what that says about you? You should probably know that this time is not remembered for its selflessness, charity or ability to work together."

"No, the ice caps are not melting any faster than they are now. There is also far less smog and industrial waste in 2036 You asked about the North Polar ice pack. I never said the environment wasn't a problem. Doesn't water expand when it freezes? If the polar ice cap melted, wouldn't sea level go down? I don't know if there's enough ice for this to make a difference and I'm not an expert on global warming."

"Yes, I realize people become hostile. I don't expect anyone to believe me and I have nothing to sell. I take no offense by it. Just out of curiosity, if you were a time traveler, what do you think it would take to get people to believe you?
I suppose we could agree that no particular era in history is famous for its development of humanity but just once I would like to hear questions like, "What is family life like in the future? How does society deal with poverty? Is AIDS, abortion and drug use still a problem?"

Why don't I give you a stock tip? The money you make would dilute the intelligence and forethought that a smart person had in picking the stock all by themselves. If I told you how to get rich, I would be taking money from them and giving it to you.
Getting back to my "proper" universe is tricky but possible. Yes, another jump would take me to a different family.
Cement block…good question. The hard part of traveling to other world lines is just that. There is a system of clocks and gravity sensors that sample the environment before dropping out. Its called VGL, (variable gravity lock). If a cement block were there, the machine would "backtrack" until it sensed relative congruity to the original gravity sample. A great deal of time and effort goes into picking just the right spot since you can not physically move during a displacement."
"Time travel is achieved by altering gravity. This concept is already proven by atomic clock experiments. The closer an observer is to a gravity source (high mass), the slower time passes for them. Traveling at high speeds mimics this effect which = the twin paradox of faster than light travel. However, this type of gravity manipulation is not sufficient to alter your world line.
The basic math to alter world lines exists right now. Tipler first described a working "time machine" through his theory of massive rotating spheres. I apologize for the web site but it was the only one I could find quickly.
http://www.geocities.com:0080/Area51/Station/5763/time.html
Certain types of black holes also exhibit the "time travel" abilities of Tipler cylinders. Kerr was one of the first to describe the dual event horizons of a rotating black hole. As with Tipler's cylinders, it was possible to travel on a "time-like" trip through a Kerr black hole and end up in a different world line without being squished by the gravity of the singularity.

http://www.physics.fsu.edu/courses/
fall98/ast1002/section4/blackholes/fig11-
13/fig11-132.htm
http://qso.lanl.gov/~bromley/nu_nofun.html
http://www.leonllo.freeservers.com/blackworm.html
http://www.astro.ku.dk/~cramer/RelViz/text/geom_
web/node4.html

The mass and gravitational field of a microsingularity can then be manipulated by "injecting" electrons onto its surface. By rotating two electric microsigularities at high speed, it is possible to create and modify a local gravity sinusoid that replicates the affects of a Kerr black hole.
For those asking how come a microsingularity doesn't swallow the Earth or want to know details about the size, stability, mass, temperature and resulting Hawking radiation from such a thing.. those details I must keep to myself."
"Yes, you can travel into the future and it takes less energy than going into the past."

"The computer system is connected to the unit through an electrical bus. There are actually three computers linked together that take the same signals from the gravity sensors and clocks. They use a Borda error correcting protocol that checks the integrity of the data and trips the VGL system."
"I would equate the "future" GM distortion units to their current jet engines. The first one worked great but they can always make it better. The C204 unit uses 4 cesium clocks. The C206 uses 6 cesium clocks but they use an optical system to check the oscillation frequency. This makes the world line divergence confidence much higher."
"Yes I believe in Jesus Christ and we pray to God in churches. There are some differences you may be interested in. Religion is a major part of peoples life in 2036. Pain and change tend to bring people together and closer to God. However, religion is far more personal than it is now. There are no huge, centralized religions and people talk openly about their beliefs. It might also interest you to know that the day of worship is Saturday, the day God meant to be the Sabbath and the 10 commandments have been restored to the "10" that God gave us."
"Life is much more rural in the future but "high" technology is used to communicate and travel. People raise a great deal of their own food and do more "farm" work. Yes, compared to now, we do work long hours. After the war, my father made a living selling oranges up and down the West coast of Florida. My closest friend raises horses and another works for a company that maintains "wireless" Internet nodes."
"A typical day...hmmm. Life has changed so much over my lifetime that it's hard to pin down a "normal" day. When I was 13, I was a soldier. As a teenager, I helped my dad haul cargo. I went to college when I was 31 and I was recruited to "time travel" shortly after that. Again...I suppose an average day in 2036 is like an average day on the farm."
"Yes...there is a post office. The Internet is still alive and well in the future. People spend more time talking because life is more centered around the community. I've noticed the same type of effect here when the power goes off. People tend to come out of their homes and actually spend time with their neighbors. There is a lot more personal trust and less paranoia."
"When I'm with my parents, I live in a community made up of "tree houses" on a large river in Florida. The river floods sometimes and we have access to the Gulf. Most of our neighbors make a living off the sea or in moving cargo by boat."
"There is a civil war in the United States that starts in 2005. That conflict flares up and down for 10 years. In 2015, Russia launches a nuclear strike against the major cities in the United States (which is the "other side" of the civil war from my perspective), China and Europe. The United States counter attacks. The US cities are destroyed along with the AFE (American Federal Empire)...thus we (in the country) won. The European Union and China were also destroyed. Russia is now our largest trading partner and the Capitol of the US was moved to Omaha Nebraska."
"I find that an interesting subject myself. Personally, I think "UFOs" might be time travelers with very sophisticated distortion units."
"One of the biggest reasons why food production is localized is because the environment is so screwed up with disease and radiation. We are making huge strides in getting it cleaned up. Water is produced on a community level and we do eat meat..that we raise ourselves."
"Yes...genetic engineering is used but it's like any other technology. It can be good and bad. One thing we did not do was create more hybrid seeds. What are people thinking???
"I am a Christian Agnostic. I do not believe faith alone is enough to get us back to God. I'm not sure what happens when we die but I'm pretty sure it's not a walk in the park."
"Hydrogen fuel cells and more efficient solar cells are big deals. Computer technology and software gets MUCH better."
"My greatest joy is sailing. For fun, I enjoy swimming, playing cards, reading, playing games on the net and talking with people who live in other countries. As a community, we celebrate much more and have bon fires and dances. My hobby is sorting through old magazines and videos of life before the war."

"After the war, early new communities gathered around the current Universities. That's where the libraries were. I went to school at Fort UF which is now called the University of Florida. Not too much is different except the military is large part of people's life and we spend a great deal of time in the fields and farms at the "University" or Fort."
"Most of my memories growing up are not fond. Life was very hard. Simple things make me happy like hugging my mother and father. Yes, we have cameras. More digital. Film is used like painting is today. No hologram camera though."
"Yes we have phones but the service is through the web. Most power generation is localized. It amazes me how much power is wasted now. Yes, solar is big. There is thought that a singularity generator could also be used but most people are against it."
"The elderly are highly revered and looked after on a community level. So are orphans. There is always something people can do now matter what. The idea of avoiding work is looked down on. Everyone pulls together to keep the COMMUNITY strong."

"Far less medical treatment in the future even though its more advanced. People die when they now its time to die. No lasers. Genetic medicine and cloning organs are the obvious new techs in the future."
"The Constitution was changed after the war. We have 5 presidents that are voted in and out on different term periods. The vice president is the president of the senate and they are voted separately."
"Without going into detail what you are here specifically for can you please explain what the primary purpose of time travel is in the future?) In 2036, a great deal of effort is going into "repairing" our environment. I was sent to 1975 to get a computer system and take it back to 2036. Time travel is not a secret in 2036 and I expect it will become more common."
"Right now, its used to get information or "items" that would be helpful in getting a post WWIII world back to a normal condition. There are 7 other time travelers in my unit."
"Right now, most of our practical missions are from 1960 to 1980. There is a great deal of research into later and future periods but the farther you go, the lower the divergence confidence of the world line."
"(If you change "vehicle" do you have to re-calibrate the unit?)

Yes. But its a function of the VGL system. A gravity baseline is taken and rechecked every time the unit is used. A new vehicle would alter the gravity signature.
(What kind of coils are used to contain, and maintain the singularity?)

I am not a physicist so I can not answer that to your level of sophistication. The singularities are held in an enclosed magnetic field.
(Can your unit also dimensionally travel?)

No. However, the longer the unit is on past a safe divergence confidence, the "stranger" the world line becomes. The unit I have is safe to about 1% for every sixty years at max power."
"My goal was to reach a certain date and time which is converted into seconds for the computer to make its calculations. I do not pick the second. Its more important to have a low divergence confidence number."
"(Let me guess, you are here NOW to look at the unusual hung election we have going on. Or maybe this is the trigger event in the coming world wide economic meltdown? Some other pivot point in history? Fess up. Why now?)
I would use the word "elections" a bit cautiously. Perhaps its easier now to see a civil war in your future?"

"(10 years an hour? from 2036 wouldn't that take three+ hours?? how could you survive with merely the pocket of air you caught in your vehicle's field??)

Yes...that's about right but my initial trip was to 1975, not 2000. I guess its a question of how many technical details you really want or you feel I'm making up. We do take additional 02 and the air pocket is a bit larger than you might think."
"(Have you considered the possible adverse consequences the person might face that you had post them for you since you remain covert? or don't you care since it is not your world line. what about the people that read the information and attempt to build one? what if they get injured in the process because they are not knowledgeable enough to handle the forces they are playing with at this "time".) Yes, I have considered it but it is very easy to remain hidden behind a veil of disbelief. The people who understand what they are seeing are not aggressive. Everyone else just finds them entertaining. The obvious first answer is that the only world line of consequence is my own and I don't care what happens here. That however, is not the case. I have shown these documents in order that people might consider the possibility. I do not expect people to believe them.
(What is your true purpose for posting assumingly "restricted" government documents on a public bulletin board where everyone can see it?)
The restricted nature of the documents I posted refers to the departmentalized nature of the technical information. The manual is supposed to remain with the unit. The current F-16 fighter jet probably has an operations manual. All the information in it is not secret but no one wants it to "walk" away from the plane.
(Did your Unit Commander authorize such a thing or is it something you decided to do completely on your own?)
I am here for personal reasons. For a few months now, I have been trying to alert anyone that would listen to the possibility of a civil war in the United States in 2005. Does that seem more likely now? Actually it's quite amazing to see what's happening. I have been trying to get people to pay attention for the last few months but to see it unfold is very interesting. Before I leave, I'll try and post my report.
I am curious... will anyone be upset if Florida's votes are not counted in the Electoral College because of the current "confusion"?
(Have you considered your actions and probable outcome carefully?)
Yes."

"(I'd like to believe you. What I need is one more prediction - you've predicted an American civil war in 2005; in order to fully believe you, I need one more unambiguous prediction like that.)
I appreciate the position you are in but you must realize that I am not affected in the least if you believe me or not.

(Something like, maybe, who will win the 100m in Salt Lake City.)

Off the top of your head, can you tell me if it rained in Atlanta this time last year? Do you think time travelers carry a sports reference with them?
(Really, anything like that, if I see two predictions like that come true you will have my unwavering belief.)

It is a mistake to give anyone your unwavering belief...but you will find that out yourself in 2005."

"(One last question, Can anybody operate the 204 unit? Or is it safe guarded by a "key of some kind? Thanks for answering. Yes, you would be welcome at my home.)
The unit has two security systems to protect it from "most" people. One, it has a code that must be entered correctly. Second, and probably more effective now, the unit can not be used by anyone who can't add and subtract."
"It is thought that being close to a gravitational field has a biological effect on all matter including cells. The effect is to slow the movement of electrons in the orbits of their nucleus which thus slows the mechanical and biological functions of the observer close to

the gravity. Thus the passing of time is a local phenomenon depending on how close you are to a gravitational source.
This is one example of a theory involving "time shells" progressing in size and intensity around a gravitational point from all matter. The more massive the object, the larger and more influential the time shells around it (like an onion). Another offshoot of this theory is that kinetic energy is actually the conversion of stored energy in the atom as it passes through time shells in a gravitational field."
"(So many questions and things to do in this time..yet you have the time to post your C204 manual on the web.)

What suggestions do you have?

(This world is run on the economical side of things and I am just curious to how you happened to blend in to "our" way of living.)

You don't think you could blend into 1970? What difficulties would you expect to have that couldn't be overcome?

BUT there are skeptics out there who might think your a loony as you have seen.)

I have nothing to sell nor do I want anyone to believe in me or take some action. What other people think of me does not affect me in the least.
(If it makes no matter that you are here telling us about your revolutionary new T.T device...what would happen if we SUPPOSEDLY built a prototype ...as my argument would state about the P3 and the 286..we would fast forward events in time.....36 years or so , with the development of a prototype c204 right NOW , using the schematics you have given us.But as Pamela said..."..don't any of you people have an opinion?")
What you do on your world line is your own business. I can't think of any better way to start a war than for someone to figure out how to make a time machine. Go for it.
(I am not out to shatter your reputation on this Forum.. but i just want simple answers.)

I will be happy to answer "almost" any question you have."

"Consider this: You are a time traveler who wishes to go back in time to 1941 because your grandparents live close to Pearl Harbor in Hawaii. You realize you can’t stop the war but you may be able to help them prepare for it. Strangely, December 7th comes and goes with no sneak attack. As the war in Europe rages on, Japan fails to join the axis power, there is no war in the Pacific and the United States remains neutral. Then, you watch as Germany begins to develop the atomic bomb… all by themselves.
For a change, I have a question for all of you. I want you to think…think very hard. What major disaster was expected and prepared for in the last year and a half that never happened?

As far as war goes, I have faith you are quite capable of starting one all by yourself. I am hard pressed to accept any criticism on my outlook on that subject. Growing up might have been a vastly different experience for me than it was for most of you. Personal responsibility, determination, honor, friendship and self-reliance are not just words we try to live up to or fantasize about. On my world line, life is not easy. We live in a world recovering from years of war, poison, destruction and hate. All of it, courtesy of the thinking and actions of people that live right now in the same world you do, worrying about which stocks to buy or whether or not a stranger is lying to them on the Internet I believe that hardship and challenge develop character and community. My first experience with war came when I joined a shotgun infantry unit at the age of thirteen. In the 4 years I served as a “rebel”, I watched hundreds of people get shot, burn and bleed to death. I know exactly where I was and every detail of the exact moment the first nuclear warheads began

falling on Jacksonville. I know the pain and regret of not acting soon enough to enjoy a relationship as a loved one dies of brain cancer from a war that gained nothing.
How can you possibly criticize me for any conflict that comes to you? I watch every day what you are doing as a society. While you sit by and watch your Constitution being torn away from you, you willfully eat poisoned food, buy manufactured products no one needs and turn an uncaring eye away from millions of people suffering and dying all around you. Is this the “Universal Law” you subscribe to?
Perhaps I should let you all in on a little secret. No one likes you in the future. This time period is looked at as being full of lazy, self-centered, civially ignorant sheep. Perhaps you should be less concerned about me and more concerned about that."
"TimeTravel_0: I have been looking over your time displacement unit and find it interesting. This is a list of the basic components as I see it.

1. Singularity drive housing.
2. Singularity magnetic field coil.
3. Magnetic field generator / regulator.
4. Electron mass injection manifold.
5. Electron regulator.
6. Electron condenser.
7. Singularity ??? sensor.
8. Singularity cooling housing.
9. Singularity cooling pump.
10. Singularity cooling supply.
11. Gravity sensor. unit.
12. Battery supply.

Can you verify these components?
What type of sensor. is number seven?
Why are the four atomic clocks not shown?"

"That looks correct. I must apologize for the poor quality of the information. There's a running inside joke about the technical issues. If the unit has a serious problem its not as if anyone can use those drawings to take the electron manifold off the singularity housing with a flat head screw driver.
(What type of sensor. is number seven?)

That sensor detects various parameters from the singularity.

(Why are the four atomic clocks not shown?)

There is another page that depicts the computer and clock systems. That technology is not new and not very interesting."

"UFOs are as much as a mystery to me as they are to you. Would you be surprised to know that there are a great many people who don’t believe in time travel on my world line?
I do believe UFOs are a real mystery but I also know that chaos theory dictates that no matter what technology or knowledge we have, there are always unknowns."
"On my world line, it is known that the 5100 series is capable of reading all the IBM code written before the widespread use of APL and Basic. Unfortunately, there are none left that anyone can find on my world line."
"The responsibility for the “disaster” is your own but I do not consider it a disaster. Rebirth is often painful. My world line is not unified under a single government but I would say it is closer to a unified purpose. Isn’t that what you want anyway? No, I do not have the ability to make calculations that would effect world lines to my advantage. Besides the fact that

manipulating people for personal gain is wrong, I am of the belief that it is best to make the world line you are on now better.
I like the incredible freedom you have on this world line but I see it as a trap and I fear the cost is the loss of your sense of connection with family and community. Yes, you can self actualize your ambitions but at what cost to the people around you…or yet to be born? The incredible availability of art, literature and limitless resources is hardly taken advantage of as I imagine the number of people sitting in front of their TVs.

No, I have not tried any fast food. Thinking about where the food came from, how it was shipped and treated absolutely terrifies me. I have tried to tell people about CJD disease and it seems to be “catching on” in Europe.

Technologies themselves are not lost but some of the older tools and techniques have been lost. I think there is more detailed information about the war posted earlier. The energy stored in the singularity is used to create the distortion fields. That energy is created in a particle accelerator. I’m not sure what you mean by “temporal turbulence”. What effect would that have that would need to be overcome?
When I leave, I will return to 2036. The computer I have is expected there. I am unaware of any “true” interdimensional device available on this world line now. I would image the effects of such a device would be hard to hide.
My “ship” is not broken. I am here by choice. Don’t you find current events interesting?
Again, I’m not sure I understand your last question. Perhaps we should agree to the definitions of a few terms and basic physics before I try to answer that."
"To the reader: feel fortunate you are reading this I had a hard time posting it hopefully it will appear this time. More questions from me to Timetravel_0 and his answers. (can you tell us which of our foods are poison and why?)(What can we do to prepare ourselves for the coming war.)

I tried to consolidate your questions into a basic list. I hope this helps.

1. Do not eat or use products from any animal that is fed and eats parts of its own dead.
2. Do not kiss or have intimate relations with anyone you do not know.
3. Learn basic sanitation and water purification.
4. Be comfortable around firearms. Learn to shoot and clean a gun.
5. Get a good first aid kit and learn to use it.
6. Find 5 people within 100 miles that you trust with your life and stay in contact with them.
7. Get a copy of the US Constitution and read it.
8. Eat less.
9. Get a bicycle and two sets of spare tires. Ride it 10 miles a week.
10. Consider what you would bring with you if you had to leave your home in 10 min. and never return.

(Can you tell us exactly what event started the war? Is there any way we can stop it?)

The war is a result of faulty politics and desperation from Western leadership during the US civil war. Yes, I suppose you could stop it.
(Are some states or countries safer than others?)

Take a close look at the county by county voting map from the last elections.
(Did they use biological and chemical weapons in the war besides nukes? Did they use mind control weapons?)
Yes there were bio and chem weapons used. No mind control weapons but there are new "non-leathal" weapon systems that turn out to be quite lethal.

(Have you discovered the cure for cancer or aids yet?)

Aids...no. Cancer...some progress.

(If our leaders of this world line were reading this posting and believe who you say you are.....what would you say to them right now?)

Revel in your confidence today because you will not win tomorrow.
(What is the main message you want to convey to us at this time?)
Please, please wake up. Look at the sign posts around you now.

(Can you explain this further when you talked of your patch and the two spirals one was the "safe" way and one was the way to God. Can you expound on that I didn't quite understand it.)
The safe way is the one calculated to take you in time where you want to go, the other path will take you to God (death). Both are equally accepted and anticipated before each trip."

--- Gary Voss

A time traveler's warning about HAARP Part III

By Ivan Van Mieghem , for the X-Factor Foundation at http://www.ivminet.com

Dear Friends,

I want to thank all of you which have responded to the 'Saint Augustin' info the time traveler revealed (ref : A time traveler' s warning about HAARP, Part II) as you might have noticed I have put the Audio of the HAARP broadcast on our website. Maybe some tech. wizards can go in a little deeper to its meaning.
I want to thank Dan from the UFOZONE, Werner, Blu, Fernando and many others for helping me on this issue.

To summarize the event:
The 'time traveler' told me he wanted to warn me about something reaching our Solar System in the present. He went back to my youth to prove his time travel capabilities in the present. He told me that there was a very hectic communication going on between Earthly Governments and 'them'. He gave me as a clue the 3390 number. Which I found out a few days ago is the frequency of a mysterious HAARP broadcast. Also he told me that it was all being initiated a long time ago and it had to do something, which I understood or was pronounced as 'Saint Augustin'. Since I had no clue on what ever that meant I asked for some help from our members and site visitors using the Internet medium. This has again revealed amazing facts and the story is getting weirder.

This new data, surely if you look at the symbolic value , combined sets
the 'Saint Augustin' in a brand new light.

1) There was a Saint Augustine, who lived 354-430AD. He became a bishop and was instrumental in spreading Roman Catholicism in Africa. He was a key figure in a time of massive change - a time, which could be seen to bridge the old "Roman" empire with the Catholic church of the middle ages. He played a founding and pivotal role in the development of the orthodoxy of the RC church.

2) Mr. Stanton T. Friedman claims in his book 'Crash at Corona' a second UFO crashed, around the same time as the now famous Roswell crash in 1947, in the plains of San Augustin near Corona -New Mexico- . In his book he proves almost without doubt that the event and cover up did happen. He (Mr. Stanton T. Friedman source a guy named J.

Anderson) also claims that a living Alien Being was captured by the US military, which came to the crash site. Mr. Friedman (one must admit that his work is almost of scientific value) is convinced that this has really happened.

So lets make a temporally conclusion regarding our 'time traveler's warning and message.

We live in a time of massive change. Something or some one is approaching our Solar system. And they are not silent or we are sending some kind of interplanetary SOS message. It could well be related to an UFO crash back in 1947. And I will be warned again some time in the future by this 'time traveler'.
Now you may wonder why I am still skeptical about my 'time traveler'. Mostly that is because I do not believe that time travel is possible for a complex living being. But if there is no such a thing as time travel who could know these unrevealed personal details from my youth. And who could tell me the exact frequency of the HAARP broadcast in December 2000.

He promised me that he will return so next time guys I will be prepared. Meanwhile I will dig into this event deeper and I will inform you on any new developments.

Thanks for all your support, help and reactions.

Sincerely,
Ivan Van Mieghem
